Is it not possible that there could be two dimensions? Scientists have thought so for a long time. Scientific mathematics has proven it. What is to prevent someone, with a special gift, from traveling between dimensions? Some people think they know everything there is to know. Truth is, if all of mankind s knowledge were packaged into one container, it wouldn t amount to a tiny fraction of what there is to know and understand. So how can we say something like this isn t possible. Nearly everything mankind has declared impossible, over the years, has been accomplished. It s something to ponder. Isn t it. Follow along as one young man gets his answer.
